

Alfasilver spray

MEDICAL DEVICE Class III for topical use sold in Italy under different brand names (Argogen spray etc...) :

-TO CONTROL THE MICROENVIRONMENT.

-ABSORBENT POWDER FOR EXUDATES.

Alfasilver spray

Mineral powder with absorbent characteristics containing ionic silver at 3%.

The only product contains Zeolite and without kaolin.

Indications:

Its use on wounds, abrasions, minor burns, injuries cutaneous, bedsores, etc.. allows control of exudates creating a clean, damp cloth to facilitate the natural healing process by keeping the area protected by the exogenous microbial proliferation.

Alfasilver spray

Other advantages:

The product remains adherent to the treated area, it does not slip away and can be easily removed with the use of saline spray. If necessary, secure the product to the wound with a sterile gauze or a bandage with breathable. **It does not contain any components derived from animal tissue** (collagen, keratin, elastin ...).
