

# HEMORRHIAL PLUS

Mucoadhesive gel for anal, perianal and endorectal use based on hyaluronic acid, quercetin and chlorhexidine digluconate. It gives relief from pain, burns and itching and it helps to counteract the onset of irritation and rubbing injuries in the perianal area. Not stain.

## INDICATIONS

Adjuvant in the treatment of symptomatology associated with anorectal disorders such as hemorrhoids, proctitis, anal and perianal ulcers.

## MODE OF USE

A product suitable for anal, perianal and endorectal use.

### • ANAL AND PERIANAL USE

Place the product on the fingers clean and apply with a slight massage in the affected area (perianal and/or anal). Wash your hands carefully after application. Close after use. Apply **2/3 times daily** and, whenever possible, after each evacuation. Use for no more than 3 weeks or until the symptoms disappear, consult your physician if you do not notice any improvement in your clinical condition.

### • ENDORECTAL USE

Remove the cap, fit the applicator and squeeze until a small amount of the product is leaking to lubricate the canula. Insert the canula gently into the rectum. Compress up to the complete emission of the product while paying attention to leaving a small amount to be applied also on the outside. Apply **1/2 times daily** if needed, when possible after each evacuation. Use for no more than 3 weeks or until the symptoms disappear, consult your physician if you do not notice any improvement in your clinical condition.

## SIDE EFFECTS

Known hypersensitivity to one of the components. It is not advisable to use it during pregnancy because no complete data are available.

# HEMORRHIAL PLUS
